Wed 29 Aug		Thursday 30 August			Friday 31 August			Saturday 1 September		
Postgraduate Course on Gastrointestinal Motility	08:30-10:30	One hundred years of peristalsis			Optogenetic control of gut function	Functional aspects of host-microbiome interactions	Therapeutic advances in FGIDs	Gastro-intestinal complications of neurological disease	Visceral pain	Dysphagia and eosinophilic esophagitis
	10:30-11:00	Coffee, Exhibits			Coffee, Exhibits			Coffee, Exhibits		
	11:00-12:30	Achalasia			Chemo-sensation and EC cells	Infection and FGIDs	Food components triggering GI symptoms	Microbiome and gut-brain axis		
	12:30-14:00	Lunch, Posters, Exhibits			Lunch, Posters, Exhibits			Adjourn		
	14:00-15:30	Epithelial biology in NG&M	Nausea	Pediatric functional GI and motility disorders	Satiety regulation and obesity	Chronic intestinal pseudo-obstruction	Integrated systems approach in IBS			
	15:30-16:00	Tea, Exhibits			Tea, Exhibits					
	16:00-17:30	Neuro-development	Mechanisms and treatment of gas and bloating	GERD	Sensory neuro-immune modulation and glial cells	Sex differences in FGIDs	Functional dyspepsia and gastroparesis
