## Edito

Dear Friends,

This week's newsletter is dedicated to the World Digestive Health Day. Every year on May 29, the WGO (World Gastroenterology Organisation) initiates a worldwide public health campaign. In 2014, the campaign is entitled "Gut Microbes – Importance in Health and Disease".

After a presentation of this edition's program and main focus, we share with you some words of this WDHD's chair, Prof. Francisco Guarner, who gave us some insights during an interview on occasion of this year's Gut Microbiota for Health World Summit.

We also invite you to discover the event organized in Mexico as part of the WDHD, the "Third International Symposium on Human Gut Microbiota in Health and Disease", through the words of its chair, Prof. Miguel Angel Valdovinos.

Visit Gut Microbiota for Health to share your thoughts, comments and references with us. You can also follow us on Twitter, LinkedIn, and now Google+ by clicking the buttons on top of this newsletter.

## Third International Symposium on Human Gut Microbiota in Health and Disease

For the third consecutive year, the "International Symposium of Human Gut Microbiota in Health and Disease" will take place in Mexico City (May 23 and 24). This meeting is endorsed by the National Institute of Medical Sciences and Nutrition, The Mexican Gastroenterology Association, The Mexican Association of Nutrition, and The Mexican College of Nutritionists, and is supported by the Danone Institute.
