

Hands-on Course for Gastrointestinal Manometry and Functional Investigations

31 March - 02 April 2019

Cluj-Napoca, Romania

We aim to offer interactive, hands-on course on several functional investigations for the gastrointestinal tract: high resolution esophageal manometry (HREM), high resolution anorectal manometry (HRAM), 24h pH-multichannel intraesophageal impedance monitoring and breath tests investigations. To maximize the learning process, participants will be divided in small groups, short lectures will precede the examinations, and case presentations will be discussed with experts.

Registration will be available between 15 October 2018-15 January 2019.

Limited participation: 20 persons

Please send your **application**, including a **short and relevant CV** along with a **letter of intent** regarding your interest in Functional investigations, before 15 January 2019 at motilityuegcourse2019@gmail.com.

The **selected participants:**

- will be contacted after 15 January 2019 with more details and information
- will be required to pay the 100 EURO participation fee (account details will be provided)
- will be offered meals and accommodation during the Course period
- will NOT have the transportation cost to Romania covered

For further information and registration contact: Teodora Surdea-Blaga at motilityuegcourse2019@gmail.com or check the www.neurogastro.ro website.
