
Discover the AGA Center for Gut Microbiome Research and Education

The AGA (American Gastroenterological Association), partner of ESNM on the Gut Summit 2013, is pleased to announce the creation of Center for Gut Microbiome Research and Education.

The gut microbiome is among the most exciting and promising areas in science today. The AGA Governing Board believes the gut microbiome should be an important priority for gastroenterology and the organization.

The AGA has therefore created the AGA Center for Gut Microbiome Research and Education to serve as a virtual "home" for AGA activities related to the gut microbiome. The mission of the center is "To advance research and education on the gut microbiome in human health and disease".
